ABOUT ME

I'm a university student at Universitas Komputer Indonesia majoring in information systems. I have an interest in Web Development and 3D design. I've gained experience working on a different scale of projects, from individual projects to corporate class projects. Yet I still have great determination in learning new stuff.
I also have experience of working with people from different countries and cultures such as British, so I can communicate well with others and am capable of working alone or inside a team.

WORK EXPERIENCE

[06/2020 – 02/2021] **Web developer**

MTs Al-Hidayah Sagalaherang

City: Subang
Country: Indonesia
Main activities and responsibilities:
I held all of the jobs in the web development process by myself, including:
doing a brief with the client, sketching, wireframing, prototyping, creating high fidelity UI design, designing and implementing a database, front-end, and back-end job

[04/2020 – 06/2021] **Web developer**

SMAN 1 Jalancagak Scout Organization

City: Subang
Country: Indonesia
Main activities and responsibilities:
My responsibilities were designing the UI of the website, developing the website according to the design, designing and implementing a database, giving the required training for the users, and maintaining the website after it was online

[03/09/2021 – 10/02/2022] **3D artist**

RFIDiom Ltd

City: Liverpool
Country: United Kingdom
Main activities and responsibilities:
I was a part of the Marketing Team at RFIDiom Ltd; my main activities were creating graphics content for social media, or blog. But I also contributed to Branding a few of the company's products. And designing UI/UX of a product website.

My special responsibilities were to create 3D assets and create 3D animations; usually, they were used to demo or advertise products.
On occasions I was also responsible for quality assurance on some websites, looking for errors, bugs, etc.
